## EXPERIENCE

**DataTorque**  
Internship

**Software Developer**  
Wellington

**Nov 2021 - Present**

DataTorque is one of New Zealand's leading tech businesses. Their focus is on tackling complexity by designing and delivering a practical solution that enables their clients around the world to efficiently collect and manage critical tax revenues. Reporting straight to the Senior Information Security Advisor and working closely with the Project Team as a Security Documentation Analyst, here is the list of tasks that I am working on at DataTorque.

- Working with complex databases and bug fixing for our revenue management system
- Doing UI tests and Integration tests using C# and JavaScript
- Contributing to developing new features for diverse products
- Working as a team and making sure the written code is in optimal condition for code review and checking in after testing.
- Working with micro front-end apps, using plugins and different packages, mainly using React.

### ***Key Achievements & Projects:***

- Provided Help to fix bugs, and contributed to doing peer reviews, so the code is ready for test
- Worked in a team of developers for a mutual goal supporting each other, providing valuable feedback.
- Worked in both small and large teams at DataTorque, and managed my work solo if required.

**Advance Sleek**  
Freelancing

**Web Developer**  
Wellington

**Oct 2021**

Advance Sleek is a company focused on bringing forth the ability to create and implement winning business plans that lead to increased sales. Managing Real estate and customer service, which allows them to understand the niche of businesses and get the results for their clients.

### ***Responsibilities:***

- Developed website using CSS/HTML/JavaScript/PHP.
- Analysing requirements and designing proof-of-concept mock-ups for clients.
- Managing client relationships, providing regular updates.

## EXPERIENCE

### ***Key Achievements & Projects:***

- Created an intuitive website where clients can find valuable content and get in contact immediately with the owner at any time.
- Provided in-person and on-phone technical support while troubleshooting clients' issues with their websites and DNS/hosting.
- Held meetings with the client, discussing in-depth how we'll build the right website to solve his particular problem, with regular follow-up meetings to go over design iterations and additions.
- Designed a responsive website designed to generate more sales and Opportunities, focusing on productivity and accessibility.

**Prelude Portfolio**  
Academic Project

**Web Developer**

**June 2021**

Yoobee College of Creative Innovation is committed to developing generation after generation of New Zealand's leading creative and technical talents. They've been doing it for 30 years under various guises and will continue for a long time to come. They believe that it takes time to become an expert, that mentorship is the key to successful work, and that relationships are central to thriving careers.

### ***Responsibilities:***

- Developed a website using CSS/HTML/JavaScript.
- Analysing requirements and designing proof-of-concept mock-ups for clients.
- Following Coding rules and guidelines to ensure that software is maintainable, testable, and reliable
- Suggesting new plans and contributing to fixing bugs.

### ***Key Achievements & Projects:***

- Created a portfolio for the students that studied at Yoobee, giving them more opportunities and connections with future agencies/clients.
- Worked as a team of developers for a mutual goal, using branches on GitHub.
- Provided Valuable Feedback when developing and contributed with peer reviews.
- Contributed to Working on the Home page, Website Styling, and responsiveness.
